

# **Restaurant Guide for Dubai**

## **Introduction**

Dubai is one of the most visited tourist destination in the world, known for its architecture as well as for its magnificent attractions. Its main goal and development towards tourism started about 7 years ago when the emirate decided to encourage foreign investments from outside the country. Considering this it is a given fact that the food industry had a significant boom over the years with cuisines from around the planet. For this reason, we have considered restaurants and its various cuisines for providing a short guide of the various restaurants based on their cuisine or the surrounding area and/or any other attractions. This would be a value-added date for visiting tourists and for new/old residents who might be unaware of all these available and attractive destinations.

## **Business Problem**

This project's primary objective is to provide details regarding the range of cuisines available and their respective locations. A deep dive analysis is then done to present the range of restaurants for a given area, cuisine and/or grouping based on both. The project also provides an analysis of the surrounding destinations for every or any selected restaurant.
